

# Expandable Conveyor

EFFICIENCY AND FLEXIBILITY

CONVEYORS

FOR INCREASED EFFICIENCY IN LOOSE LOADING AND UNLOADING OF VEHICLES

## Applications :

Especially designed to increase the efficiency of loading and unloading of vehicles, it is also used on packaging lines or to effect bonding between the machines.

Flexibility of use, it's easily manoeuvrable thanks to its industrial swivel wheels with foot brakes.

**1. Large, bright zinc plated welded steel handles**  
Positive grip points for safe and easy manoeuvring of the conveyor.

**2. Reinforced, ribbed zinc plated steel side plates**  
Fully bolted design without rivets. Roller retaining tag washers.

**3. Additional strength**  
Structural support across width with lower fixed axles.  
Heavy duty square tubing leg frames with bracing.

## Foolproof flexibility :

## KINDS OF EXPANDABLE CONVEYORS :

- Gravity Roller
- Powered Roller
- Gravity Skatewheel

Conforms to health and safety standards, CE compliant.
