

Slide Tray Sorter

A REAL CAN-DO SORTING SOLUTION

FLAT SORTERS

Whether the products to be sorted are small and lightweight or large and heavy, the Slide Tray Sorter will never let you down.

Angled trays

For safe and gentle sorting into the right destination

Sorting products

Into totes, cartons, bags, roller cages, etc.

Capacity

Between 4 000 and 28 000 trays, per hour depending on tray size

Induction of products

Products can either be manually induced directly into the trays or (semi) automatically by use of an induction belt.

The trays are ergonomically sound and user-friendly because they are at an angle.

The Slide Tray Sorter is eminently suitable for the sortation of parcels, post, DVDs and CDs.

Product Identification

In order to identify the products to be sorted into the sorter trays, different methods can be used :

- coding the desired products on a touch screen
- manually or automatically scanning of the products SKU bar code with omni-camera scanning

Peripheral Systems

There are all sorts of peripheral systems available to complement the STS :

- inbound conveyors for transporting products to be sorted to the induction zones
- take-away conveyors for transporting full boxes or totes with sorted products
- omnidirectional scanner systems or camera systems
