

Wide Oval Sorter

VERSATILITY PLUS TWICE AS MANY DESTINATIONS

FLAT SORTERS

The Wide Oval Sorter offers you all the benefits of an Oval Sorter and **twice as many destinations**.

Compact layout

Designed to optimally fit into your warehouse

Tilting plates

For doubling the number of destinations

Sorting products

Into totes, cartons, trolleys, roll cages, etc.

Induction of products

There are several ways to induct the products into the sorter trays :

- manually from a platform
- automatically using an induction belt
- semi automatic infeed induction
- smart hybrid singulation system
- manual induction from groundfloor

Product Identification

In order to identify the products to be sorted into the sorter trays, different methods can be used :

- coding the desired products on a touch screen
- manually or automatically scanning of the products SKU bar code with omni-camera scanning

Peripheral Systems

There are all sorts of peripheral systems available to complement the WOS :

- conveyor systems for transporting products to and from the sorter
- automatic box closing, taping, strapping, labelling machines
- automatic weighing and cubing
